

LED SCREENS

Now every event can afford large screen technology.

Large video screens have come of age in the 21st century - high brightness, high resolution LED screens have become standard at many events.

Piccadilly AV have invested in the latest high resolution screens that offer excellent colour definition and extreme brightness. Our new high resolution 10mm screens have an output of 8000 NITS for full daylight use and are also ideal for indoor events and broadcast use.

We also provide a range of support equipment, including cameras and large scale sound systems including line array.

- Motorsports
- Airshows
- Concerts and Festivals
- Parties and Celebrations
- Equestrian Events
- Sports Events

Our screens are modular and can be built almost anywhere. We can install platforms for the construction of screens on any terrain without the use of large truss structures. For indoor or flown installations Piccadilly can also supply lifting beams and rigging equipment – all safety tested.

- Ground Supported
- Flown screens
- Special shapes/ratios
- Multiple inputs
- Text banners
- Indoor & Outdoor

Piccadilly AV can also offer LED screens for Sale or Lease. We offer a consultancy service to assist clients thinking of investing in LED technology.

We can construct screens of any size and aspect ratio - essentially, LED technology has improved in quality and reduced in price meaning any event can afford a big screen!
